

Using

ride access pass

on rides

When I arrive

at the theme park

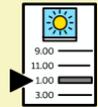

I will click

on

my

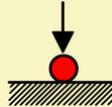

pre book

and

select

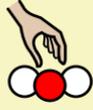

check in.

I

will select

the

ride

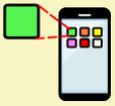

I

want to

go on in the

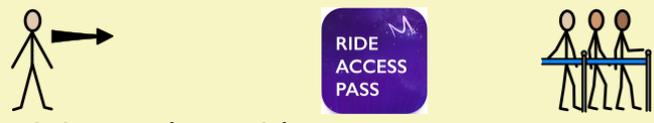

app.

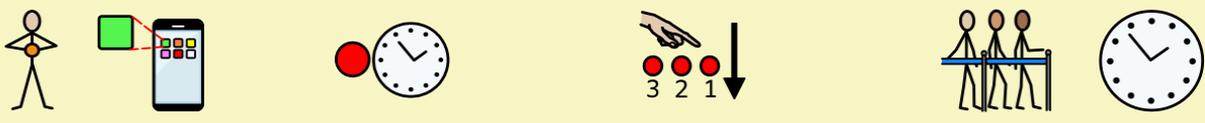

When I get to a ride I will scan the QR code.

Then join the ride access pass queue.

My app will already be counting down the queue time.

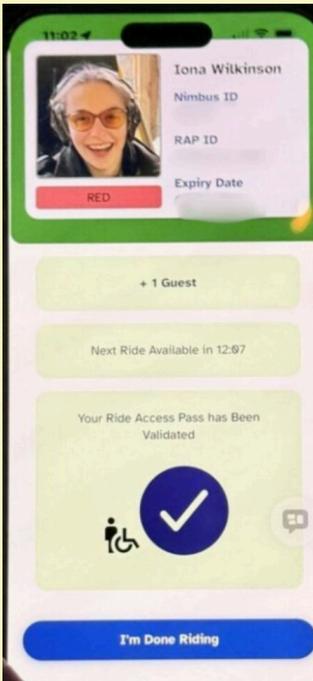

When I'm at the front a staff member will look at my app to

see I've scanned the QR code for the ride.

A staff member will also check the ride access pass ID on

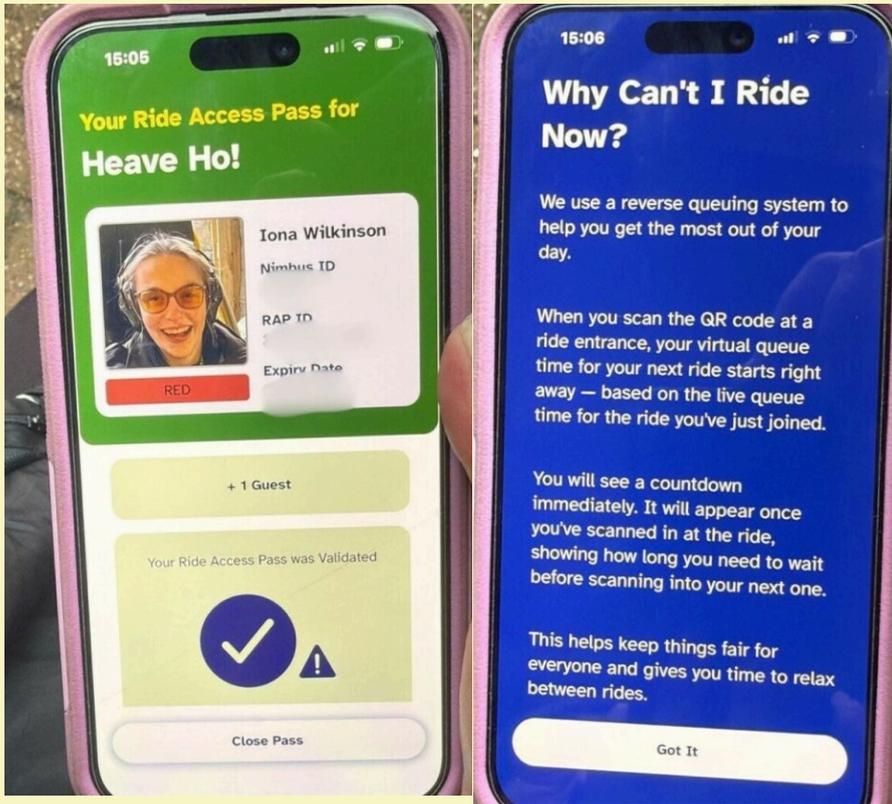

the app is mine.

I need to go on all rides I use my app for.

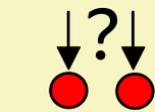

When I have got off the ride I can click the finished

ride button.

I

will find

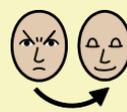

somewhere

to

wait

and

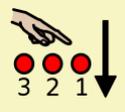

regulate

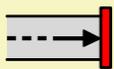

till

my

countdown

is finished.

I can

go

in the

sensory room

or find an

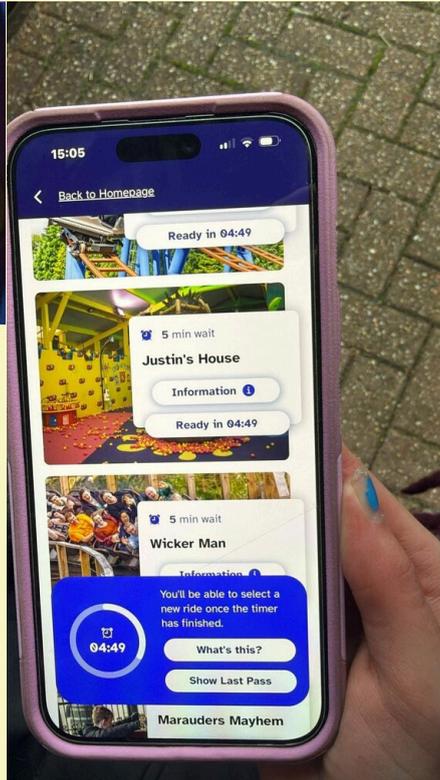

open space

to

run around.

The

staff

in

guest services

can

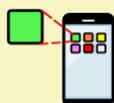

answer

any

question

have

about the

app.
